Rate Constants for Common Reaction Orders	
Reaction Order	**Units of *k***
zero	mol/L/s
first	s^{-1}
second	L/mol/s
third	$mol^{-2}\ L^{2}\ s^{-1}$

Table 17.1

Note that the units in the table can also be expressed in terms of molarity (*M*) instead of mol/L. Also, units of time other than the second (such as minutes, hours, days) may be used, depending on the situation.
